

Welcome To Our Talented Team!

You have made an excellent decision to join us moving forward as a group with Calco Concrete Pumping. Our beginnings are humble; starting Calco in 1991, pumping throughout the Vail Valley.....Cal operating our first pump a 1979 28m Schwing on a DT466 International which overheated when going up hill so he had to turn on the heater to keep the engine cool and roll down the windows to keep himself cool. You can imagine the hills he climbed here in the Vail Valley! He had a job in Wildridge, above Avon, and as he was climbing a little girl passed him on her bicycle a little angry because he was holding her up. Me, I was doing Calco's payroll and bookkeeping in my spare time while working another job. We were blessed with a few really good customers who helped us get started and off we went. I must admit, I was skeptical.

You too may have questions about your decision to work at Calco. Rest assured, you are in good hands. Our team members have many years of experience. Operations managers are the best in the business, and you will receive training from them every day. You are encouraged to ask questions and make comments any time. You also have the privilege of working with people I consider to be the Dream Team, those who rise to the top and offer advanced experience and knowledge in their field. All are anxious to share with you and help you be the best you can be.

You may be one of those people who are advanced in experience in this industry. I'm sure you too have a story to tell, and I would love to hear it. Your expertise is respectfully appreciated, and I welcome you to the Dream Team as a valuable member.

We applaud your decision and welcome you as a member of our ever-growing company. Your interests are Calco's main concern. I encourage your comments and suggestions at all times. We join you in looking forward to an exciting future.

Your Partner in Success!
